TrustForge

3/4 · Prove

CART

Cybersecurity, assessed continuously.

THE QUESTION

"Does our security hold over time, not just on audit day?"

CART continuously assesses infrastructure resilience, within a contractually authorised scope, and turns the results into a risk score for leadership.

What you get

- Continuous assessment instead of a yearly check
- Locked authorised scope and human approval
- Risk score and summary the board can read
- AWS and Azure cloud coverage
- Detection recommendations for defence teams, SIEM export, SSO

Who it's for
CISOs, defence teams, executive committees

Frameworks
MITRE ATT&CK · CIS Benchmark

When
Continuously, between audits

WITHIN THE TRUSTFORGE SUITE

1. Prepare	2. Comply	3. Prove	4. Secure AI
