TrustForge

THE SUITE · 4

From declared compliance to proven trust.

Forging digital trust, from audit to AI.

Cybersecurity, data, artificial intelligence: the connected enterprise must now prove it is ready, compliant, resilient and in control of its AI. TrustForge brings together four solutions that follow one journey.

THREE CHALLENGES, ONE REQUIREMENT: PROOF

Regulation is accelerating

NIS2, the EU AI Act, ISO 42001, NCA ECC, GDPR: regulators and customers now demand evidence, not statements.

Risk is continuous, controls are not

A yearly audit captures a single moment. Your information system changes every week.

AI is everywhere, often ungoverned

Copilots, agents, internal assistants: new assets to inventory, govern and protect.

ONE JOURNEY, FOUR SOLUTIONS

1. Prepare

AuditForge Readiness

Is our organisation ready for AI, and where should we start?

2. Comply

AuditForge

Are we compliant, and can we prove it?

3. Prove

CART

Does our security hold over time, not just on audit day?

4. Secure AI

GMI-AISEC

Are our generative AI systems and agents under control?

↻ then reassess, continuously

The four solutions

Prepare

AuditForge Readiness

Diagnose before you automate.

- Interviews with business champions and the gap between leadership's view and the field
- Mapping of processes and friction points
- Value / difficulty matrix: justified quick wins and big bets

Comply

AuditForge

The entire audit engagement, from scoping to report.

- 15+ frameworks with cross-mappings
- Findings, action plans and remediation tracking with deadlines
- Statement of Applicability, GDPR register and DPIA

Prove

CART

Cybersecurity, assessed continuously.

- Continuous assessment instead of a yearly check
- Locked authorised scope and human approval
- Risk score and summary the board can read

Secure AI

GMI-AISEC

Your AI, governed and under control.

- AI asset inventory and architecture mapping
- Threat analysis and 34 controls across 8 categories
- Governed testing: prior authorisation, separation of duties, emergency stop

ONE SHARED DNA

Humans decide
AI suggests and accelerates. Approvals stay human.

Nothing out of scope
No assessment without explicit authorisation and a defined scope.

Everything is traceable
Tamper-proof audit logs and versioned deliverables: every piece of evidence stands up.

Your data stays yours
Strict separation between clients in every solution.

PACKAGED OFFERS

Trust Foundation
AuditForge Readiness + AuditForge
AI maturity and compliance in one approach.

Proven Resilience
AuditForge + CART
From declared compliance to demonstrated resilience.

Trustworthy AI
AuditForge Readiness + GMI-AISEC
Deploy AI without losing control.

TrustForge Complete
All four solutions
The full cycle, reassessed continuously.
